WORKSHEET 05

Spatial Plan

Sketch your world from above. One square = _____ metres. Mark north, the main path, every zone, and the landmark. Draw arrows for important sightlines.

Team / names		World name	

Legend: ━ path ▒ edge / boundary ◯ zone ● node (where paths meet) ▲ landmark → sightline ★ spawn point

Zones and sizes

ID	Zone	Approx. size (m)	Connects to	Can you see the landmark from here?

Z4				
Z5				
Z6				

Wayfinding check (Kevin Lynch's five elements)

Element	In our world, this is…
Paths: routes people move along	
Edges: boundaries (shoreline, wall, treeline)	
Districts: areas with their own character	
Nodes: meeting points, intersections	
Landmarks: things you navigate by	

Scale check

- ☐ 1 unit = 1 metre. Eye height 1.6 m, door 2.1 m, ceiling about 2.7 m.
- ☐ A first-time visitor can tell where to go within 10 seconds of arriving.
- ☐ Every zone can be seen from at least one other zone.
- ☐ Boundaries are natural (water, trees, cliffs), with invisible walls only as a last resort.
